## FIRE PITS

- The Tomerong Hall committee does not encourage having a fire at an event on the grounds of Tomerong Hall.
- If you choose to have a fire it must be inside an enclosed structure, such as a fire box or brazier which you would provide.
- The fire would need to be supervised by a responsible adult at all times.
- The enclosed fire structure must be situated away from the hall building, trees and gardens and it must not be placed on the pavers.
- No fire accelerant to be used at any time.
- The fire would need to be completely extinguished prior to the event ending.
- The fire pit would need to be removed and all ash from the fire would need to be removed from the grounds.
- No ash to be placed in the hall garbage bins.
- Any unburnt wood would also need to be removed.

**It is possible that the hall will be hired for another event on the following day so the removal of the fire pit and cleaning of the grounds would need to be undertaken early the following morning.**
